

MEDICHOICE®

PREMIUM ENZYMATIC PRESOAK

CLEANER

MEDICHOICE® Premium Enzymatic Presoak Cleaner effectively removes blood, tissue, mucous and other difficult soils from surgical instruments and scopes. This presoak cleaner will loosen and dissolve organic matter, even dried-on blood and tissue, and prepare instruments for complete disinfection and sterilization.

MEDICHOICE® Premium Enzymatic Presoak Cleaner contains stabilized proteolytic enzymes with maximum activity. These enzymes work synergistically with the surfactants for the fastest action available in a liquid cleaner using nature's own cleaning agents. This presoak cleaner combines additional anionic and nonionic surfactants with sodium xylene sulfonate, propylene glycol, chelating agents, stabilizers and buffers, which together with the enzymes provides the ultimate cleaner for proteinaceous matter.

ADVANTAGES OF PREMIUM ENZYMATIC PRESOAK

CLEANER

- Neutral pH, non-corrosive
- Disintegrates proteinaceous matter in hard to reach crevices
- Removes soils fast
- Significantly reduces the need for manual cleaning
- Highly concentrated (1 oz. per gallon)
- Controlled foaming
- Pleasant floral fragrance

NOTE: For use as **presoak, manual cleaning, ultrasonic cleaning equipment and washer sterilizer equipment.** Packaged in four 1-gallon containers per case, and 15-gallon containers.
